EDUCATION

Northeastern University, Boston, MA   **Expected:** May 2023
Master of Science in Information Systems
Relevant Courses: Application Engineering and Development, Web Designing, iOS development, DBMS

Acropolis Technical Campus, INDIA   May 2018
Bachelor of Engineering in Computer Science & Computer Engineering
Relevant Courses**:** Software Engineering, Database Management, Computer Networking, Data Structure & Algorithms

TECHNICAL SKILLS

Web Technologies: HTML 5, CSS 3, JavaScript, jQuery
Programming Languages: Java, C, C++, C#, Dot Net, Swift, Python

Databases: MySQL Server, MySQL
Framework & Tools: MVC, Windows, Git, Bootstrap5, Visual Studio 2017, MS Office, X code, Swing

WORK EXPERIENCE

Software Engineer Co-op   July 2022-Present
Fidelity Investments, Boston, US
- Started cooperating with the back-end developer in the process of building the REST API.
- Developing and administering the new Angular based website.
- Debugging simple programs using written and verbal design specifications.
- Worked in an agile environment to deliver high-quality software.

Customer Experience Technician (CxT)   August 2021-Present

Information Technology Services, Northeastern University, Boston

- Collaborated with IT personnel to design, develop, analyze, debug, and execute C# (Objective C) programs for windows and other operating systems desktop and web-based applications.
- Handled several customer's needs easily by multitasking and solving problems to support technical issues.
- Maintained strong service knowledge to better assist customers with concerns, questions, and general education.

Software Developer   May 2018 – May 2020
Larsen & Toubro InfoTech, Chennai, INDIA

- Developed software code using C# programming language to meet design specifications, and user requirements as well as delivering high-quality applications within specified deadlines.
- Designed style content and website layout for user experience using HTML5, CSS3 and Bootstrap focused on designing impactful products as a part of the design team on frameworks like Model View Controller (MVC).
- Implemented a new website design layout for building robust and scalable web-based applications supporting all types of devices.
- Created and maintained Stored Procedures and queries using Microsoft SQL and analyzed the production issues to decide underlying driver and gives fixed proposals to the improvement group.

ACADEMIC PROJECTS

Medical Care Application   September 2021 - Dec 2021
- Developed a healthcare application using tech stack React native, MongoDB, NodeJS, and express JS for providing users with all the healthcare solutions like medicines, masks, covid essentials as well as women care products. Also, explored cloud infrastructure and deployed the application on cloud.

Covid Vaccination Management System   January 2021 - April 2021
- Programmed the application to help individuals in getting Coronavirus vaccination shots by utilizing java swing and DBO4(database) following the standards of Object-situated plan and MVC design. Developed collaborative working and effective communication skills while working with the team.
